STICKER INSTALLATION

Transfer decals / clear transfer tape

DIFFICULTY / EASY
24-HOUR WAIT
Before tape removal

TOOLS REQUIRED
Rubbing alcohol or soap and water, clean cloth, squeegee or credit card.

IMPORTANT
Use only on a clean, completely dry surface. Avoid glass cleaners; they can prevent adhesion.

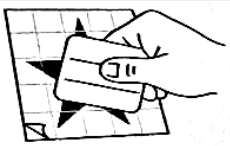

1 CLEAN THE SURFACE

Use rubbing alcohol or soap and water, then dry completely.

AVOID GLASS CLEANERS.

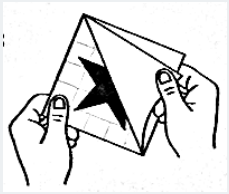

2 PREPARE THE STICKER

Firmly rub across the transfer tape with a squeegee or credit card. This helps the design stick to the transfer tape.

RUB FIRMLY ACROSS THE TRANSFER TAPE.

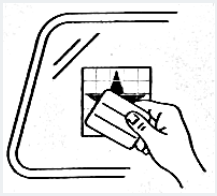

3 REMOVE THE BACKING

Slowly peel the paper backing away at an angle. If the design stays on the paper, replace the backing and repeat Step 2.

PEEL THE BACKING SLOWLY AT AN ANGLE.

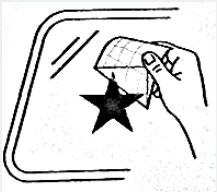

4 APPLY THE STICKER

Position the sticker, then firmly rub over the transfer tape with a squeegee or credit card.

WAIT 24 HOURS BEFORE REMOVING THE TRANSFER TAPE.

5 REMOVE THE TRANSFER TAPE

Peel the transfer tape away slowly at an angle. If any part of the design lifts, press it back down and repeat Step 4.

CHECK THAT THE ENTIRE DESIGN IS ADHERED.

TRANSFER DECAL CHECK
The clear tape should be removed and the complete design should remain on the surface.
